

Long Term Vision

While the companion website <https://ChronicDiseasePreventionStrategies.com> has its own short term and long term visions, **Wellness Risk Management** has its visions listed here.

The Wellness Risk Management **Follow the Science PILOT Wellness Program** will assess the feasibility of this long term vision.

VISION Statement of Intent

Wellness Risk Management intends to develop a Wellness Risk Management Instructor Directorship Program in all companies and governmental organizations that wish one. The following plan will be phased in as needed.

1. For larger companies that wish an in-house program
2. For smaller companies that are not able to sustain a directorship program on their own
3. For governmental organizations at all levels of government
4. For the general public who are not part of a company or governmental organization.

An implementation document is available for companies reviewing Wellness Risk Management.
