Implementation of WRM Long Term Vision for Instructor Directorship Programs

This document is intended for a company's management team to review when the company management has an interest in **WRM**.

In 2023 Dr. Victor Jean Ouellette, DC, MS is setting up a **Follow the Science PILOT Wellness Program** in targeted companies that have an interest in providing a new Wellness model to their workforce. If and when, sufficient interest is available in the company's workforce, then the program to train a **Wellness Risk Management Instructor Assistant** will begin. When ready, that instructor assistant will take over WRM Instructor duties from Dr. Ouellette for that company. While waiting for worker interest to develop Dr. Ouellette, will run the workshops.

Two Unknowns

What is unknown at the present time is how much interest a company's management team has in promoting Wellness Risk Management within their workforce. Secondly what is also unknown is how much interest the workforce will have to pursue Wellness Risk Management and Chronic Disease Prevention Strategies. When we sort that out, continued accommodation will be made for enrolled workers even if there is not sufficient interest to sustain a directorship program.

Company Involvement in Worker's Wellness

Companies do not have to become largely involved in expensive promotion programs. It is anticipated that posting flyers in appropriate visible places, and possibly on Web sites, indicating that the Wellness Risk Management program is available to people, will be sufficient. Complementary flyer copies may be available.
